## HPS-C-SLOT<sup>+</sup>

### The cost-efficient slot controllers

HPS-C-SLOT<sup>+</sup> hot runner controllers are designed for precise control of hot runner systems with a low or medium number of cavities. They are available in three housing versions for up to 12 zones per controller. The modular design allows the quick installation or exchange of controller modules. By interconnecting two housings up to 24 zones can be controlled simultaneously.

Each control module allows the easy and convenient operation of two zones.

# Controller functions at a glance

Adaptive PID<sup>2</sup> control algorithm with Power-Priority®

Comfortable operation

Fast temperature scanning, 20 x per second

Phase angle control (1000 steps)

Drying-up only if heating elements are humid

Comprehensive process monitoring

Auto mode in case of thermocouple failure

24-zone controller with two interconnected 12-zone housings.

## Technical data

<b>Housing:</b>	Metal housing, powder coated
<b>Power supply:</b>	230 / 400 V AC (+/- 10 %, 50 - 60 Hz)
<b>Connector:</b>	16 A CEE (2 zones, housing with 1 slot), 32 A CEE (2 - 12 zones, housing with 3 or 6 slots)
<b>Power output:</b>	max. 15 A per zone, phase angle control, 1000 steps
<b>Thermocouple:</b>	Fe-CuNi Type J / NiCr-Ni Type K
<b>Control accuracy:</b>	Better 1 °C, self optimizing
<b>Control range:</b>	50 - 500 °C
<b>Operating temperature:</b>	5 - 40 °C
<b>Control module display:</b>	<ul style="list-style-type: none"> <li>- Overview of zone status for all zones</li> <li>- Display of setpoint / actual value for selected zones (°C or °F)</li> <li>- Power output in A or %</li> <li>- Alarm indicators for temperature and load circuit, current (overcurrent, open load), earth fault and thermocouple (break, reverse polarity)</li> </ul>
<b>Optional features:</b>	<ul style="list-style-type: none"> <li>- 1 signal input, 1 alarm output (not for housing with 1 slot, requires network module)</li> <li>- Rack with castors</li> </ul>

## HPS-C-PRO<sup>+</sup>

### High performance controllers with touch screen operation

Thanks to their extremely fast and precise temperature control the HPS-C-PRO<sup>+</sup> hot runner controllers are the number one choice - not only for standard applications but also for demanding high-cavitation systems using slim and low mass hot runner nozzles which are difficult to control. Furthermore, they feature an easy and intuitive operation with comprehensive diagnostic, protocol and error detection functions. Depending on the application requirements HPS-C-PRO<sup>+</sup> controllers are available in different versions and housing types.

# Controller functions at a glance

"Mold Wizard" for easy, intuitive start-up and configuration	Comprehensive process monitoring
Sequential start with compound heating	Early leakage detection
Adaptive PID <sup>2</sup> control algorithm with Power-Priority®	Auto mode in case of thermocouple failure
Maximum screen update rate 0.1 s	Mold ID, automatic mould recognition / mould memory
Fast temperature scanning, 20 x per second	Mould graphics with real time data overlay
Phase angle control (1000 steps)	Mold Doctor®, mould defect analysis
Kilowatt monitor (actual value, average, max, min)	Data recording, logging and error logging
Drying-up only if heating elements are humid	Thermocouple "Rewire" for rectification of wiring errors
Operator management and identification	Acoustic und optic alarm signal
	Language selection
